Feathered Dinosaurs: The Origin of Birds By John Long, Peter Schouten

Scientists have recovered more than a billion fossils, but no discovery has been more breath-taking than the fossils recently found in northern China, findings which prove that several families of dinosaurs had feathers, or feathery hair-like coverings, adorning their bodies.

Now in the beautifully designed *Feathered Dinosaurs*, paleontologist John Long and illustrator Peter Schouten provide a stunning visual record of these extraordinary prehistoric creatures, illuminating the evolutionary march from primitive, feathered dinosaurs through to the first true flying birds. Schouten, an acclaimed natural history artist, has created 80 full-color paintings that capture the striking physical traits of these feathered dinosaurs. Drawing on his extensive knowledge of the lifestyles of modern birds and mammals, plus the extant scientific data regarding how these dinosaurs might have looked and behaved, Schouten has produced not only the most beautiful but also the most accurate visual representations of these animals in print. Equally important, John Long, a noted paleontologist and widely published science author (with some 24 books to his credit), provides an engaging companion text that places these feathered dinosaurs within the larger family of dinosaurs--for instance, outlining their relationship to *T. Rex* and *Velociraptor*, species well known to *Jurassic Park* fans--and discusses the factual information that can be deduced from their fossil remains, in effect providing an insightful natural history of this remarkable group.

A true marriage of art and science, *Feathered Dinosaurs* presents an unprecedented visual record of one of the most significant breakthroughs in the history of vertebrate paleontology--the discovery that many predatory dinosaurs were cloaked with feathers, perhaps just as colorful and fanciful as those of their living relatives.

Editorial Review

Review

"With this handsome field guide you can spend an afternoon happily 'proto-birding' as it were, without leaving your living room."--*Natural History*

"This volume is thought-provoking and attractive, and anyone (of any age) interested in dinosaurs will enjoy looking at it."--ScienceBlogs

"The author and artist are to be congratulated on this superb book about the discoveries of feathered dinosaurs and their relationship to the origin of birds."--Zhonghe Zhou, Senior Research Fellow and Acting Director, Institute of Vertebrate Paleontology and Paleoanthropology, Chinese Academy of Sciences

"An astonishing glimpse of the world of dinosaurs. Something you could never imagine."--Tim Flannery, author of *The Weather Makers*

"An unprecedented visual record of one of the most significant breakthroughs in the history of vertebrate paleontology--the discovery that a diversity of predatory dinosaurs were cloaked with feathers, perhaps just as colorful and fanciful as those of their living relatives."--Luis M. Chiappe, Director, The Dinosaur Institute, Natural History Museum of Los Angeles County, Los Angeles

About the Author

John Long is Head of Sciences for Museum Victoria, Australia. A renowned paleontologist, he has collected fossils in Antarctica, Africa, throughout Asia, and has worked extensively in North America, Europe, and in every part of Australia. He has written or co-authored some 24 books, and in 2001 won Australia's prestigious Eureka Prize for the Public Promotion of Science.

Peter Schouten is an award-winning artist and illustrator of natural history books. His books include *A Gap in Nature* and *Astonishing Animals*. He spent two years working on the 80 magnificent illustrations in this book.

Users Review

From reader reviews:

Marcia Eberhart:
