Ophthalmology: A Pocket Textbook Atlas By Gerhard K. Lang

This

larger-format third edition of a remarkable atlas reflects the latest advances in the constantly evolving specialty of ophthalmology. Firsthand knowledge is culled from the authors' decades of patient consultations, teaching, and combined surgical experience. Cataract, diabetic retinopathy, glaucoma, and age-related macular degeneration are covered along with other eye diseases affecting millions of people worldwide. Disorders less frequently seen in clinical practice are included in its comprehensive coverage.

Organized anatomically, the comprehensive, this expertly written text covers the entire scope of ophthalmologic practice. Its systematic didactic outline detailing symptoms, examination findings, and diagnosis makes it easy to follow and consult.

Key Features:

- A detailed chapter on clinical ophthalmological examination
- Anatomical, pathophysiological, diagnostic, and clinical data on every area of the eye
- 600 highest quality color photographs, superb illustrations, and overviews illustrate clinical findings and pathophysiology
- Tables include important medications, reference dimensions, and standard values, cardinal symptoms and diagnoses
- A glossary of technical ophthalmological terms
- New design and larger, clearer format

Medical

students and ophthalmology residents will find this an invaluable reference tool. This concise compendium also offers a stellar study aid for board exam preparation, and provides an excellent ophthalmology refresher course for practicing clinicians and allied healthcare professionals.

Editorial Review

Review

A great book...photos and drawings are excellent and illustrate common disease presentations, anatomy, surgical basics, examination techniques, and imaging/testing concepts in a very clear manner...best geared to the ophthalmic professional.--Doody's Book Reviews

From the Back Cover

The authors' constant interactions with medical students in the classroom, on the hospital ward, and in oral examinations ever since this pocket atlas first appeared in English 2001 have enabled them to update both the text and the illustrations for this new English edition. Like its predecessor, the 2nd edition provides a concise, thorough and up-to-date introduction to the field of ophthalmology. Medical students on ophthalmology rotations, as well as beginning residents, will find it an invaluable companion on the ward and a useful aid for test preparation. Fully trained physicians and other health professionals, too, will be able to use it for a self-taught refresher course in ophthalmology.

The special features of this book include:

- More than 500 clear, well-drawn illustrations and color photographs illustrating clinical findings, disease pathophysiology, and more
- Many new illustrations since the previous edition reflecting the latest developments in the field, particularly in the chapters on the retina and the cornea
- A new appendix containing correlations between clinical findings and the latest examining techniques, as well as a guide to visual field defects
- Comprehensive presentation of examining techniques
- An expanded glossary and a copiously illustrated table of important anatomical structures
- A convenient and comprehensive table of cardinal manifestations of disease with associated findings, probable diagnoses, and suggestions for diagnostic work-up
- Clearly and consistently organized chapters on all major diseases

Just as in the 1st edition, the individual chapters are organized to maximize their usefulness as a teaching tool:

- Each chapter begins with the relevant basic concepts in anatomy and physiology
- All diseases are consistently presented in accordance with clinical logic: first the symptoms, then the examination findings, then the diagnosis
- The diseases are both described in words and shown in didactically useful illustrations

Understand the entire field of ophthalmology with this compact, beautifully illustrated text!

Users Review

From reader reviews:

Angela Caves:

What do you with regards to book? It is not important together with you? Or just adding material when you want something to explain what your own problem? How about your spare time? Or are you busy particular person? If you don't have spare time to try and do others business, it is make you feel bored faster. And you have free time? What did you do? Every person has many questions above. They need to answer that question because just their can do in which. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need this kind of Ophthalmology: A Pocket Textbook Atlas to read.
