Forensic Mental Health Assessment of Children and Adolescents From Oxford University Press

Most professional forensic literature addresses the assessment of adults yet neglects the necessary differences that arise when working with minors. *Forensic Mental Health Assessment of Children* presents the reader with essential knowledge and practical suggestions regarding the forensic assessment of minors involved in a variety of legal applications. Methods of evaluation are described by leading experts regarding topics frequently encountered and of great importance to the courts including:

- Physical and sexual child abuse
- Domestic violence
- Child custody in divorce proceedings
- Risk assesment for violence
- Potential for rehabilitation in juvenile court cases
- Special education
- Childhood development and trauma as mitigating circumstances in death penalty cases

In addition to reviewing a broad spectrum of topics, methods of evaluation, and the application of specific tests, chapters also address forensic assessment matters such as ethical issues, professional liability, and cultural considerations. This comprehensive resource will be indispensable to mental health practitioners and legal professionals, and of great interest to researchers and students.

Editorial Review

Review

"This volume is historically significant. For almost 100 years, mental health professionals have been offering assessments to serve children, families, and legal professionals in juvenile courts. Its guidance is sound, and it will have a defining impact on the growth of the field."--**Thomas Grisso**, Ph.D., Director of the Mental Health and Law Core, Center for Mental Health Services Research, University of Massachusetts Medical School, Worcester, MA

"A critically important forensic resource! Drs. Sparta and Koocher have assembled leading experts in the field to convey the latest advances in a thorough, practical, and accessible fashion."--**Eric Y. Drogin**, J.D., Ph.D., ABPP, Franklin Pierce Law Center, Concord, NY

"Sparta and Koocher have produced an absolutely essential and state-of-the-art book for practitioners, scholars, and students who deal with the complex yet crucial issues of forensic assessment of child and adolescent mental health. This volume is a 'must' for everyone interested in this important area. The book has my highest praise."--**Gail S. Goodman**, Professor of Psychology, University of California, Davis

"This volume is chock-full of really valuable information for professionals charged with evaluating children and adolescents. The chapters are up-to-date, highly readable, and brimming with useful advice. I think that anyone who does forensic evaluations, including interviewing children for suspected abuse and neglect, custody disputes, and rehabilitation prospects will find this volume very helpful. I plan to use it with my students."--**Stephen J. Ceci**, Ph.D., The Helen L. Carr Professor of Developmental Psychology, Department of Human Development, Cornell University, Ithaca, NY

"Sparta and Koocher have orchestrated a masterpiece. This book represents a remarkable compendium of expertise in uncharted territory. Treatment of such concerns as child plaintiffs in personal injury litigation, the role of childhood abuse and development issues in capital sentence mitigation, the assessment of childhood arson and juvenile sex offender allegations, and numerous other contributions bring fresh, relevant, and concise syntheses of the literature and the legal standards into harmony with professionally sound evaluation techniques. The forensic examiner who addresses children's issues will find it indispensable, and it should be considered a primary text for forensic training programs."--**Mary Connell**, Ed.D., ABPP; President, American Academy of Forensic Psychology, 2003-2005, Fort Worth, TX

"This book is a must-read for every mental health professional whose intention is to conduct forensic evaluations of children that meet the highest professional and ethical standards. Each chapter reflects a

respect for children as developing persons and the need for forensic assessments that take into account the multiple contexts--familial, legal, cultural, economic--that impede or promote children's mental health. The volume offers a wealth of information that will be helpful to those in the early stages of forensic assessment as well as seasoned professionals who want to ensure their work is guided by the profession's most up-to-date research, assessment instruments, and assessment techniques."--**Ceila B. Fisher**, Ph.D., Professor of Psychology and Director, Center for Ethics Education, Fordham University, Bronx, NY

"This book forms a much needed bridge between the fields of juvenile law and child and adolescent psychology. The scope of the book is impressive, as is the list of contributors. Certainly, I believe that Sparta and Koocher accomplish their goal. The field of child and adolescent forensic psychology has needed a comprehensive text such as this, and the book fills a void that has existed for too long in the literature. The book is well written, pleasant to read, and should be useful to professionals at any level of practice. Thus, the publication of *Forensic Mental Health Assessment of Children and Adolescents* is timely and may be considered a seminal work, despite its lack of competition."--*Journal of Psychiatry and Law*

About the Author

Dr. Steven N. Sparta is Clinical Professor of Psychiatry (Voluntary), University of California at San Diego School of Medicine, Adjunct Professor of Law, Thomas Jefferson School of Law, and Adjunct Professor of Psychology, San Diego State University. He was Chair of the Ethics Committee of the American Psychological Association; former President and Fellow of the San Diego Psychological Association; and previously served as Chief Psychologist, Children's Hospital San Diego. Dr. Sparta is Boarded in Clinical and Forensic Psychology (ABPP) and maintains an independent practice.

Dr. Gerald P. Koocher is Associate Provost and Professor of Psychology at Simmons College and a Senior Lecturer at Harvard Medical School. Having served as the President of the American Psychological Association (APA) and as the Chief Psychologist at Children's Hospital Boston, he has authored more than 200 articles and book chapters and authored or edited 15 books.

Users Review
