Academic Press Library in Signal Processing, Volume 2: Communications and Radar Signal Processing From Academic Press

This second volume, edited and authored by world leading experts, gives a review of the principles, methods and techniques of important and emerging research topics and technologies in communications and radar engineering.

With this reference source you will:

- Quickly grasp a new area of research
- Understand the underlying principles of a topic and its application
- Ascertain how a topic relates to other areas and learn of the research issues yet to be resolved
- Quick tutorial reviews of important and emerging topics of research in array and statistical signal processing
- Presents core principles and shows their application
- Reference content on core principles, technologies, algorithms and applications
- Comprehensive references to journal articles and other literature on which to build further, more specific and detailed knowledge
- Edited by leading people in the field who, through their reputation, have been able to commission experts to write on a particular topic

Editorial Review

From the Back Cover

This second volume, edited and authored by world leading experts, gives a review of the principles, methods and techniques of important and emerging research topics and technologies in communications and radar engineering.

Features:

- Quick tutorial reviews of important and emerging topics of research in communications and radar engineering
- Presents core principles in signal processing theory and shows their application
- Reference content on core principles, technologies, algorithms and applications
- Comprehensive references to journal articles and other literature on which to build further, more specific and detailed knowledge
- Edited by leading people in the field who, through their reputation, have been able to commission experts to write on a particular topic

With this reference source you will:

- Quickly grasp a new area of research
- Understand the underlying principles of a topic and its application
- Ascertain how a topic relates to other areas and learn of the research issues yet to be resolved

About the Author

Sergios Theodoridis acquired a Physics degree with honors from the University of Athens, Greece in 1973 and a MSc and a Ph.D. degree in Signal Processing and Communications from the University of Birmingham, UK in 1975 and 1978 respectively. Since 1995 he has been a Professor with the Department of Informatics and Communications at the University of Athens.

Users Review

From reader reviews:

Jessica Keith:

What do you ponder on book? It is just for students as they are still students or that for all people in the world, exactly what the best subject for that? Just you can be answered for that query above. Every person has distinct personality and hobby for each other. Don't to be compelled someone or something that they don't desire do that. You must know how great in addition to important the book Academic Press Library in Signal Processing, Volume 2: Communications and Radar Signal Processing. All type of book can you see on many solutions. You can look for the internet solutions or other social media.

Terrie Delgadillo:

Reading a publication can be one of a lot of task that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new details. When you read a e-book you will get new information because book is one of numerous ways to share the information or perhaps their idea. Second, reading a book will make you more imaginative. When you examining a book especially fictional book the author will bring you to imagine the story how the character types do it anything. Third, you can share your knowledge to some others. When you read this Academic Press Library in Signal Processing, Volume 2: Communications and Radar Signal Processing, you could tells your family, friends in addition to soon about yours publication. Your knowledge can inspire average, make them reading a e-book.

James Hutchinson:

Exactly why? Because this Academic Press Library in Signal Processing, Volume 2: Communications and Radar Signal Processing is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will distress you with the secret the idea inside. Reading this book next to it was fantastic author who also write the book in such amazing way makes the content within easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you for not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of positive aspects than the other book have such as help improving your skill and your critical thinking technique. So , still want to postpone having that book? If I have been you I will go to the e-book store hurriedly.

Kevin Diaz:

You can get this Academic Press Library in Signal Processing, Volume 2: Communications and Radar Signal Processing by browse the bookstore or Mall. Merely viewing or reviewing it could to be your solve trouble if you get difficulties for the knowledge. Kinds of this guide are various. Not only by written or printed but can you enjoy this book by e-book. In the modern era including now, you just looking by your local mobile phone and searching what your problem. Right now, choose your ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still upgrade. Let's try to choose suitable ways for you.
