Our History

Hooked on Phonics® was created in 1987 by a father whose son was struggling to read. To help his son, he developed a systematic in-home phonics program for children. Extensive television and radio advertising featuring the memorable 1-800-ABCDEFG® phone number and the catchy "Hooked on Phonics worked for me!" tagline helped make Hooked on Phonics a household name.

In the 15 years since, more than 2 million families and thousands of schools have turned to Hooked on Phonics for its growing library of educational programs, including reading, math, and study skills.

How Our Products Work

What makes Hooked on Phonics unique is that we use our proven learn-practice-play approach. We provide children with bite-sized pieces of new information in every lesson so they are able to master the new concept and achieve success every time.

The easy-to-follow learn-practice-play approach:

Learn: Kids learn a new skill or concept.

Practice: Kids practice the concept until they master it.

Play: Kids read great books and play games so they can enjoy applying their new knowledge.

From the Inside Flap

Parents Recommend It!

"We've tried several products from educational stores, and she didn't really get anywhere. But, with Hooked on Math, it's just amazing! She just got it."

Nick Gulbranson:

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some reserve, they are complained. Just minor students that has reading's heart and soul or real their pastime. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that reading through is not important, boring and can't see colorful pictures on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Hooked on Math: Addition And Subtraction can make you feel more interested to read.
