Lectures on Curves, Surfaces and Projective Varieties (Ems Textbooks in Mathematics) By Ettore Carletti, Dionisio Gallarati, and Giacomo Monti Bragadin Mauro C. Beltrametti

This book offers a wide-ranging introduction to algebraic geometry along classical lines. It consists of lectures on topics in classical algebraic geometry, including the basic properties of projective algebraic varieties, linear systems of hypersurfaces, algebraic curves (with special emphasis on rational curves), linear series on algebraic curves, Cremona transformations, rational surfaces, and notable examples of special varieties like the Segre, Grassmann, and Veronese varieties. An integral part and special feature of the presentation is the inclusion of many exercises, not easy to find in the literature and almost all with complete solutions. The text is aimed at students in the last two years of an undergraduate program in mathematics. It contains some rather advanced topics suitable for specialized courses at the advanced undergraduate or beginning graduate level, as well as interesting topics for a senior thesis. The prerequisites have been deliberately limited to basic elements of projective geometry and abstract algebra. Thus, for example, some knowledge of the geometry of subspaces and properties of fields is assumed. The book will be welcomed by teachers and students of algebraic geometry who are seeking a clear and panoramic path leading from the basic facts about linear subspaces, conics and quadrics to a systematic discussion of classical algebraic varieties and the tools needed to study them. The text provides a solid foundation for approaching more advanced and abstract literature.

Editorial Review

Review

"...experts will readily detect how the modern viewpoint really informs these authors' approach, the better to smooth any future transition for students first entering the subject." ---- D.V. Feldman, Choice

Users Review

From reader reviews:

Fannie Garcia:

Have you spare time for the day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to often the Mall. How about open or maybe read a book titled Lectures on Curves, Surfaces and Projective Varieties (Ems Textbooks in Mathematics)? Maybe it is being best activity for you. You understand beside you can spend your time with the favorite's book, you can wiser than before. Do you agree with it has the opinion or you have other opinion?

William Prentice:

The book Lectures on Curves, Surfaces and Projective Varieties (Ems Textbooks in Mathematics) make you feel enjoy for your spare time. You need to use to make your capable more increase. Book can to become your best friend when you getting anxiety or having big problem along with your subject. If you can make reading a book Lectures on Curves, Surfaces and Projective Varieties (Ems Textbooks in Mathematics) for being your habit, you can get considerably more advantages, like add your own personal capable, increase your knowledge about many or all subjects. You are able to know everything if you like open up and read a book Lectures on Curves, Surfaces and Projective Varieties (Ems Textbooks in Mathematics). Kinds of book are several. It means that, science guide or encyclopedia or other folks. So , how do you think about this guide?

Gregory Polster:

Book is to be different for each and every grade. Book for children until adult are different content. As you may know that book is very important normally. The book Lectures on Curves, Surfaces and Projective Varieties (Ems Textbooks in Mathematics) ended up being making you to know about other expertise and of course you can take more information. It is rather advantages for you. The guide Lectures on Curves, Surfaces and Projective Varieties (Ems Textbooks in Mathematics) is not only giving you far more new information but also to become your friend when you really feel bored. You can spend your spend time to read your reserve. Try to make relationship with all the book Lectures on Curves, Surfaces and Projective Varieties (Ems Textbooks in Mathematics). You never feel lose out for everything if you read some books.

Tom Harris:

Reading a book make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is composed or printed or created from each source in which filled update of news. In this modern era like right now, many ways to get information are available for you actually. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just trying to find the Lectures on Curves, Surfaces and Projective Varieties (Ems Textbooks in Mathematics) when you required it?
