Theory and Practice of Contemporary Pharmaceutics From CRC Press

With a shift toward problem-based learning and critical thinking in many health science fields, professional pharmacy training faces a shift in focus as well. Although the Accreditation Council for Pharmacy Education (ACPE) has recently suggested guidelines for problem solving to be better integrated into pharmacy curriculum, pharmacy books currently available either address this material inadequately or lack it completely. Theory and Practice of Contemporary Pharmaceutics addresses this problem by challenging pharmacy students to think critically in preparation for situations that arise in clinical practice.

This book offers a wealth of up-to-date information, organized in a logical sequence, corresponding to the art and science required for formulators in industry and dispensing pharmacists in the community. It breaks down the subject to its simplest form and includes numerous examples, case studies, and problems. In addition to presenting basic scientific principles, each chapter includes a self-evaluation tutorial designed to help you evaluate your understanding of the subject matter, numerical problems that provide practice in finding mathematical solutions, and case studies that measure your overall grasp of the subject matter by challenging you to craft a plausible solution to a real-life scenario using the concepts presented in that chapter.

Written by authors selected from academia, industry, and regulatory agencies, the book presents an objective and balanced view of pharmaceutical science and its application. The authors' insights are extremely helpful to pharmacy students as well as practicing pharmacists involved in the development and/or dispensation of existing and new generation biotechnology-based drug products. This simplified and user-friendly book will present pharmaceutics in a way that it has never been presented before and will help prepare students and pharmacists for the competitive and challenging nature of the professional market.

Editorial Review

Review

The authors have a wealth of both industry and academic experience making this a well organized book. ... [It] presents the subject matter in a logical fashion. The problems at the end of each chapter help students reinforce newly learned concepts and serve as a valuable learning tool. The book accomplishes its goal by providing thorough coverage of the material.

From reader reviews:

Diana Castillo:

Nowadays reading books become more and more than want or need but also get a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge your information inside the book that will improve your knowledge and information. The data you get based on what kind of guide you read, if you want drive more knowledge just go with education books but if you want experience happy read one having theme for entertaining for example comic or novel. The actual Theory and Practice of Contemporary Pharmaceutics is kind of publication which is giving the reader unpredictable experience.

Janice Oconnell:

Many people spending their time frame by playing outside using friends, fun activity having family or just watching TV all day every day. You can have new activity to invest your whole day by studying a book. Ugh, ya think reading a book will surely hard because you have to bring the book everywhere? It okay you can have the e-book, having everywhere you want in your Mobile phone. Like Theory and Practice of Contemporary Pharmaceutics which is keeping the e-book version. So , why not try out this book? Let's observe.

Sheila Powell:

Is it you who having spare time subsequently spend it whole day simply by watching television programs or just resting on the bed? Do you need something new? This Theory and Practice of Contemporary

Pharmaceutics can be the response, oh how comes? A fresh book you know. You are thus out of date, spending your time by reading in this fresh era is common not a nerd activity. So what these guides have than the others?

Patricia Little:

As a student exactly feel bored in order to reading. If their teacher inquired them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's soul or real their interest. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that studying is not important, boring and also can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Theory and Practice of Contemporary Pharmaceutics can make you really feel more interested to read.
