Forensic Criminology By Andy Williams

This text provides an examination of the aetiological development of forensic criminology in the UK. It links the subjects of scientific criminology, criminal investigations, crime scene investigation, forensic science and the legal system and it provides an introduction to the important processes that take place between the crime scene and the courtroom. These processes help identify, define and label the 'criminal' and are crucial for understanding any form of crime within society. The book includes sections on:

- the epistemological and ontological philosophies of the natural sciences;
- the birth of scientific criminology and its search for the criminal 'body';
- the development of early forms of forensic science and crime scene investigation;
- investigating crime;
- information, material and evidence;
- crime analysis and crime mapping;
- scientific support and crime scene examination; and
- forensic science and detection methods and forensics in the courtroom.

The text combines coverage of historical research and contemporary criminal justice processes and provides an introduction to the most common forensic practices, procedures and uses that enable the identification and successful prosecution of criminals.

Forensic Criminology is essential for students of criminology, criminal justice, criminal investigations and crime science. It is also useful to those criminal justice practitioners wishing to gain a more in-depth understanding of the links between criminology, criminal investigations and forensics techniques.

Editorial Review

Review

‘This long-awaited book will become part of the foundational literature in forensic criminology. It is essential reading for students, practitioners, and academics who wish to fully appreciate the interplay between theoretical/substantive criminology and the practical world of forensic science, as well as everyday investigative and legal decision-making. Fortunately for both criminal justice professionals and general citizenry alike, the gap between theory and practice has just been substantially narrowed.’
- Daniel B. Kennedy, Ph.D., Oakland University and President, Forensic Criminology Associates, Inc., USA

‘This is a very timely and important book for the progression of forensic criminology. It uses an impressive array of literature and sources to provide a rigorous and robust overview of the historical and theoretical contexts which underpin contemporary forensic practice and relevant criminology. It demonstrates the tangible links between the evolution of criminological thought and its utilisation in forensic practice without adhering to a formulaic description of tasks, science and technologies. Instead, this book offers an interesting and insightful overview of developments in regards to the relevant science, techniques and ideologies, which is augmented by a detailed commentary on their underlining application and development.’ - Dr Paul Smith, Institute of Criminal Justice Studies, University of Portsmouth, UK

‘A useful point of reference for all students of forensic criminology. This book concisely summarises historical developments and research through to current thinking in a logical framework from crime scene to court room.’ - Terry Lowe, Head of Scientific Services Department, Hampshire Constabulary, UK

About the Author

Andy Williams is Principal Lecturer and Programme Area Leader at the Institute of Criminal Justice Studies at Portsmouth University. His main research areas are forensic criminology; forensic techniques and their uses and interpretation in court; dangerous offenders; public protection and offender profiling. His previous books include: *The Anatomy of Serious Further Offending* (Oxford University Press, with Mike Nash); *The Handbook Of Public Protection* (Willan, with Mike Nash); and *The Myth of Moral Panics* (Routledge, with Bill Thompson).

Users Review

From reader reviews:

Brandy Hagaman:

In this 21st one hundred year, people become competitive in each way. By being competitive now, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yep, by reading a reserve your ability to survive enhance then having chance to remain than other is high. For you who want to start reading any book, we give you this particular Forensic Criminology book as beginning and daily reading book. Why, because this book is more than just a book.

Edward Rideout:

Nowadays reading books become more and more than want or need but also get a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge even the information inside the book that improve your knowledge and information. The information you get based on what kind of publication you read, if you want send more knowledge just go with schooling books but if you want truly feel happy read one with theme for entertaining for example comic or novel. The actual Forensic Criminology is kind of e-book which is giving the reader unstable experience.

Jesse Kennedy:

A lot of people always spent all their free time to vacation or perhaps go to the outside with them friends and family or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you would like try to find a new activity here is look different you can read some sort of book. It is really fun for yourself. If you enjoy the book that you read you can spent all day every day to reading a e-book. The book Forensic Criminology it doesn't matter what good to read. There are a lot of those who recommended this book. They were enjoying reading this book. In case you did not have enough space to deliver this book you can buy the actual e-book. You can m0ore very easily to read this book out of your smart phone. The price is not too costly but this book features high quality.

Jean Cunningham:

Playing with family within a park, coming to see the ocean world or hanging out with pals is thing that usually you will have done when you have spare time, subsequently why you don't try issue that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Forensic Criminology, it is possible to enjoy both. It is fine combination right, you still want to miss it? What kind of hang type is it? Oh can occur its mind hangout people. What? Still don't obtain it, oh come on its called reading friends.
