By Rognvaldur Hannesson

Investing for Sustainability: The Management of Mineral Wealth By Rognvaldur Hannesson

Mineral deposits are non-renewable; they do not grow in the ground. Sustainable use of finite mineral wealth requires that revenues from mineral extraction be invested in renewable wealth, education and infrastructure, machines and other production equipment, or in financial assets. Different countries, states and provinces have done so with a varying degree of success. *Investing for Sustainability: The Management of Mineral Wealth* highlights mineral rents investment funds in Norway, Alaska and Alberta, all of which derive considerable revenues from the production of petroleum bound to diminish over time. The book examines the institutional and political framework in which these funds are embedded and how successfully they have been used for making non-renewable petroleum wealth permanent.

Investing for Sustainability: The Management of Mineral Wealth begins with a discussion of the elusive concept of sustainability. New technology and substitution has made a resource like peat obsolete long before it became exhausted physically. Jevons' famous book "The Coal Question" is discussed at some length as a case of unwarranted concern about the depletion of resources. The book also highlights other cases which strike a less happy note. Nauru, one of the smallest sovereign states in the world, has for decades lived off phosphate resources that are now running out. Nauru attempted to make its phosphate wealth permanent through investment funds but failed.

Despite its success with its Permanent Fund, less of the oil wealth of Alaska has been made permanent than would appear warranted, and the same is true of Alberta and Norway. Judging from the experiences of the three funds, and the current political debate in Norway, *Investing for Sustainability: The Management of Mineral Wealth* suggests that it is essential that the citizenry at large benefit directly from mineral rents investment funds if they are to succeed.

Editorial Review

Users Review

From reader reviews:

Betty Epperson:

Nowadays reading books become more and more than want or need but also work as a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge your information inside the book that improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want have more knowledge just go with schooling books but if you want feel happy read one having theme for entertaining for example comic or novel. The actual Investing for Sustainability: The Management of Mineral Wealth is kind of guide which is giving the reader unpredictable experience.

Thomas Barreto:

Why? Because this Investing for Sustainability: The Management of Mineral Wealth is an unordinary book that the inside of the book waiting for you to snap this but latter it will zap you with the secret this inside. Reading this book adjacent to it was fantastic author who else write the book in such awesome way makes the content inside easier to understand, entertaining means but still convey the meaning completely. So, it is good for you because of not hesitating having this ever again or you going to regret it. This amazing book will give you a lot of benefits than the other book get such as help improving your talent and your critical thinking means. So, still want to hesitate having that book? If I had been you I will go to the guide store hurriedly.

Delbert Lambert:

Playing with family in the park, coming to see the marine world or hanging out with close friends is thing that usually you will have done when you have spare time, then why you don't try thing that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Investing for Sustainability: The Management of Mineral Wealth, you may enjoy both. It is excellent combination right, you still wish to miss it? What kind of hang-out type is it? Oh can happen its mind hangout guys. What? Still don't obtain it, oh come on its identified as reading friends.

Stacie Schneider:

What is your hobby? Have you heard that question when you got students? We believe that that query was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. And also you know

that little person like reading or as reading through become their hobby. You must know that reading is very important and book as to be the factor. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You will find good news or update about something by book. Amount types of books that can you take to be your object. One of them is niagra Investing for Sustainability: The Management of Mineral Wealth.
