Editorial Review

From the Publisher

Written especially for future special education teachers who will work in public schools, this text examines educational assessment of individuals with mild to moderate disabling conditions. The author's applied approach to the material presented through a step-by-step series of hands-on activities provides students with thorough, guided practice in actually using the tools and tests they will encounter when working. Coverage focuses specifically on assessment of individuals with the highest incidence of disability conditions--learning and behavioral problems. It encompasses special education, fundamental principles on which assessment is based, and specific assessment tools and techniques available to the special education teacher. The Second Edition underscores the social responsibility of professionals in assessment to exercise fairness and accuracy in the decision-making process.
