War and Technology By Jeremy Black

In this engaging book, Jeremy Black argues that technology neither acts as an independent variable nor operates without major limitations. This includes its capacity to obtain end results, as technology's impact is far from simple and its pathways are by no means clear. After considering such key conceptual points, Black discusses important technological advances in weaponry and power projection from sailing warships to aircraft carriers, muskets to tanks, balloons to unmanned drones?in each case, taking into account what difference these advances made. He addresses not only firepower but also power projection and technologies of logistics, command, and control. Examining military technologies in their historical context and the present centered on the Revolution in Military Affairs and Military Transformation, Black then forecasts possible future trends.

Editorial Review

Review

"Specialists will appreciate Black's insightful analysis." ?Publishers Weekly

"An interesting, thought provoking work by a major military historian... whose depth and wide range of knowledge across the entire sweep of world military history is without parallel.... Those who read this book closely will be richly rewarded for it is a mine of useful information and grist for discussion." ?Spencer C. Tucker, author of *The Great War, 1914–1918*

"Students will find this book a most useful introduction to a very complex subject, and particularly valuable for its notes and references to other works. Provocative and vigorously argued, Black's book will stimulate professional discussion and debate, particularly on the subject of military revolutions, always welcome in the defense community and to those who seek to understand the complex interplay of technology and warfare.... Highly recommended." ?Choice

"Clear, concise, and thoughtful. An eminently readable synthesis of historical literature on technology and war... with analyses of the limitations of the impact of technology on warfare." ?John France, author of *Perilous Glory: The Rise of Western Military Power*

"...[F]or those interested in diving into these realities behind military history, this book is thoughtful and valuable." ?Library Journal

About the Author

Jeremy Black is Professor of History at the University of Exeter. He is author of more than 100 books including *Fighting for America: The Struggle for Mastery in North America, 1519-1871* (IUP, 2011) and *War and the Cultural Turn*. Black received the Samuel Eliot Morison Prize from the Society for Military History in 2008.

Users Review

From reader reviews:

Barbara Taylor:

Here thing why this specific War and Technology are different and dependable to be yours. First of all examining a book is good but it really depends in the content than it which is the content is as tasty as food or not. War and Technology giving you information deeper as different ways, you can find any book out there but there is no book that similar with War and Technology. It gives you thrill examining journey, its open up your personal eyes about the thing in which happened in the world which is probably can be happened around you. You can bring everywhere like in park your car, café, or even in your technique home by train. For anyone who is having difficulties in bringing the branded book maybe the form of War and Technology in e-book can be your alternative.

Scott Peters:

Reading can called mind hangout, why? Because if you find yourself reading a book especially book entitled War and Technology your mind will drift away trough every dimension, wandering in most aspect that maybe unidentified for but surely will end up your mind friends. Imaging just about every word written in a reserve then become one contact form conclusion and explanation in which maybe you never get ahead of. The War and Technology giving you another experience more than blown away the mind but also giving you useful data for your better life on this era. So now let us demonstrate the relaxing pattern here is your body and mind are going to be pleased when you are finished looking at it, like winning a. Do you want to try this extraordinary paying spare time activity?

Rafael Rainey:

That guide can make you to feel relax. This book War and Technology was vibrant and of course has pictures around. As we know that book War and Technology has many kinds or type. Start from kids until adolescents. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are usually make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book for you and try to like reading that will.

Michelle Han:

What is your hobby? Have you heard that will question when you got scholars? We believe that that problem was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. So you know that little person similar to reading or as looking at become their hobby. You must know that reading is very important along with book as to be the point. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You discover good news or update concerning something by book. A substantial number of sorts of books that can you go onto be your object. One of them is actually War and Technology.
