

# Campbell Essential Biology with Physiology (3rd Edition)

By Eric J. Simon, Jane B. Reece, Jean L. Dickey

**Campbell Essential Biology with Physiology (3rd Edition)** By Eric J. Simon, Jane B. Reece, Jean L. Dickey

Key Benefit: *Campbell Essential Biology with Physiology*, Third Edition provides essential, effective solutions to the challenges faced by instructors and their students in the non-majors biology course.

- 1. Three features (Biology and Society, Process of Science, and Evolution Connections) found at the beginning, middle and end of every chapter give students a **memorable** framework to take with them into the future.
- 2. One compelling topic anchors the three book features in each chapter to emphasize how biology is highly **relevant**.
- 3. The book and the media are designed from the ground up to **teach biology to** a wide range of students.
- 4. asteringBiology, our online tutorial and assessment system, makes it easy to increase student participation and accountability.

#### Campbell Essential Biology... Essential Solutions

Key Topics: Introduction: Biology Today, Essential Chemistry for Biology, The Molecules of Life, A Tour of the Cell, The Working Cell, Cellular Respiration: Obtaining Energy from Food, Photosynthesis: Using Light to Make Food, Cellular Reproduction: Cells from Cells, Patterns of Inheritance, The Structure and Function of DNA, How Genes are Controlled, DNA Technology, How Populations Evolve, How Biological Diversity Evolves, The Evolution of Microbial Life, Plants, Fungi, and the Move onto Land, The Evolution of Animals, An Introduction to Ecology and the Biosphere, Population Ecology, Communities and Ecosystems, Unifying Concepts of Animal Structure and Function, Nutrition and Digestion, Circulation and Respiration, The Body's Defenses, Hormones, Reproduction and Development, Nervous, Sensory, and Motor Systems, The Life of a Flowering Plant, The Working Plant Market Description: Intended for those interested in learning the essentials of biology

Market Description: Intended for those interested in learning the essentials of biology

About the Author

**Eric J. Simon** is an associate professor of biology at New England College in Henniker, New Hampshire. He teaches introductory biology to both science majors and non-science majors, as well as upper-level courses in genetics, microbiology, and molecular biology. Dr. Simon received a B.A. in biology and computer science and an M.A. in biology from Wesleyan University and a Ph.D. in biochemistry from Harvard University. His research focuses on innovative ways to use technology to improve teaching and learning in the science classroom, particularly for non-science majors. Eric is the lead author of the introductory biology textbooks "Essential Biology" and "Essential Biology with Physiology" and is a co-author on "Biology: Concepts and Connections."

Jane B. Reece has worked in biology publishing since 1978, when she joined the editorial staff of Benjamin Cummings. Her education includes an A.B. in biology from Harvard University (where she was initially a philosophy major), an M.S. in microbiology from Rutgers University, and a Ph.D. in bacteriology from the University of California, Berkeley. At UC Berkeley and later as a postdoctoral fellow in genetics at Stanford University, her research focused on genetic recombination in bacteria. Dr. Reece taught biology at Middlesex County College (New Jersey) and Queensborough Community College (New York). She is the lead author of Biology, Eighth Edition, and Biology: Concepts & Connections, Sixth Edition.

**Jean L. Dickey** is a professor of biology at Clemson University. She had no idea that science was interesting until her senior year in high school, when a scheduling problem landed her in advanced biology. Abandoning plans to study English or foreign languages, she enrolled in Kent State University as a biology major. After receiving her B.S. in biology, she went on to earn a Ph.D. in ecology and evolution from Purdue University. Since joining the faculty at Clemson in 1984, Dr. Dickey has specialized in teaching non-science majors, including a course designed for pre-service elementary teachers and workshops for in-service teachers. She also developed an investigative laboratory curriculum for general biology. Dr. Dickey is the author of Laboratory Investigations for Biology, Second Edition, and is a coauthor of *Biology: Concepts & Connections*, 6th Edition.

#### **Users Review**

#### From reader reviews:

#### **Kevin Buckley:**

The book Campbell Essential Biology with Physiology (3rd Edition) give you a sense of feeling enjoy for your spare time. You need to use to make your capable a lot more increase. Book can to get your best friend when you getting tension or having big problem with the subject. If you can make examining a book Campbell Essential Biology with Physiology (3rd Edition) for being your habit, you can get much more advantages, like add your personal capable, increase your knowledge about some or all subjects. You can know everything if you like open up and read a publication Campbell Essential Biology with Physiology (3rd Edition). Kinds of book are a lot of. It means that, science book or encyclopedia or others. So, how do you think about this e-book?

#### **Kermit Diaz:**

In this 21st century, people become competitive in every way. By being competitive currently, people have do something to make them survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated it for a while is reading. Yes, by reading a guide your ability to survive enhance then having chance to stay than other is high. In your case who want to start reading any book, we give you this specific Campbell Essential Biology with Physiology (3rd Edition) book as beginning and daily reading book. Why, because this book is usually more than just a book.

#### **Arthur Warnick:**

Spent a free time to be fun activity to complete! A lot of people spent their down time with their family, or their very own friends. Usually they undertaking activity like watching television, likely to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Might be reading a book may be option to fill your cost-free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to try out look for book, may be the reserve untitled Campbell Essential Biology with Physiology (3rd Edition) can be good book to read. May be it may be best activity to you.

#### **Shirley Bishop:**

That e-book can make you to feel relax. This kind of book Campbell Essential Biology with Physiology (3rd Edition) was colorful and of course has pictures on the website. As we know that book Campbell Essential Biology with Physiology (3rd Edition) has many kinds or variety. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore not at all of book are generally make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading in which.
