Nonhuman Primates in Biomedical Research, Volume 2, Second Edition: Diseases (American College of Laboratory Animal Medicine) From Academic Press

The 2e of the gold standard text in the field, *Nonhuman Primates in Biomedical Research* provides a comprehensive, up-to-date review of the use of nonhuman primates in biomedical research. The *Diseases* volume provides thorough reviews of naturally occurring diseases of nonhuman primates, with a section on biomedical models reviewing contemporary nonhuman primate models of human diseases. Each chapter contains an extensive list of bibliographic references, photographs, and graphic illustrations to provide the reader with a thorough review of the subject.

- Fully revised and updated, providing researchers with the most comprehensive review of the use of nonhuman primates in bioledical research
- Addresses commonly used nonhuman primate biomedical models, providing researchers with species-specific information
- Includes four color images throughout

Editorial Review

Review

"This two-volume set builds on the earlier volumes, updates and expands the material to include a more international perspective on regulatory oversight, important model systems, and research areas where non-human primates play a pivotal role. High-resolution color images support the text. The first volume contains 19 contributions, beginning with a history and including discussion of laws and regulations and of non-human primate taxonomy, social behavior, reproduction and breeding, and housing, as well as clinical and surgical techniques, anesthesia, and safety. The second volume, on diseases, contains 18 contributions on the specifics of research pertaining to tuberculosis, parasitic diseases, malaria, atherosclerosis, diabetes and obesity, nervous system disorders, and drug and alcohol addiction, among other topics."--Reference and Research Book News, August 2012, page 211

About the Author

Keith Mansfield is Associate Director for Resource and Collaborative Affairs and Chair, Division of Primate Resources, New England National Primate Research Center, Harvard Medical School, Harvard University, Southborough, US. His research focuses on primarily on the recognition of spontaneously occurring infectious diseases of nonhuman primates and their development into novel animal models to investigate disease pathogenesis.

Suzette D. Tardif, Ph.D., is the Associate Director of Research at the Southwest National Primate Research Center. She is an adjunct faculty of The Barshop Institute. The Tardif laboratory's activities center on the development of the marmoset monkey as a disease model. Dr. Tardiff is a past-President of the American Society of Primatologists.

Users Review

From reader reviews:

Patricia Clay:

What do you about book? It is not important together with you? Or just adding material when you require something to explain what the ones you have problem? How about your time? Or are you busy particular person? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? All people has many questions above. They should answer that question since just their can do this. It said that about book. Book is familiar in each person. Yes, it is correct. Because start from on pre-school until university need this particular Nonhuman Primates in Biomedical Research, Volume 2, Second Edition: Diseases (American College of Laboratory Animal Medicine) to read.

Patricia Koop:

A lot of people always spent all their free time to vacation as well as go to the outside with them household

or their friend. Did you know? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. If you would like try to find a new activity here is look different you can read a new book. It is really fun for you. If you enjoy the book you read you can spent all day every day to reading a guide. The book Nonhuman Primates in Biomedical Research, Volume 2, Second Edition: Diseases (American College of Laboratory Animal Medicine) it doesn't matter what good to read. There are a lot of people that recommended this book. These folks were enjoying reading this book. If you did not have enough space to bring this book you can buy often the e-book. You can m0ore very easily to read this book from a smart phone. The price is not to cover but this book offers high quality.

Amy Rodriguez:

This Nonhuman Primates in Biomedical Research, Volume 2, Second Edition: Diseases (American College of Laboratory Animal Medicine) is great publication for you because the content which can be full of information for you who have always deal with world and also have to make decision every minute. This book reveal it details accurately using great manage word or we can claim no rambling sentences in it. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only will give you straight forward sentences but tricky core information with beautiful delivering sentences. Having Nonhuman Primates in Biomedical Research, Volume 2, Second Edition: Diseases (American College of Laboratory Animal Medicine) in your hand like getting the world in your arm, information in it is not ridiculous a single. We can say that no publication that offer you world with ten or fifteen tiny right but this guide already do that. So , this can be good reading book. Hi Mr. and Mrs. busy do you still doubt that will?

Judi Orta:

That guide can make you to feel relax. That book Nonhuman Primates in Biomedical Research, Volume 2, Second Edition: Diseases (American College of Laboratory Animal Medicine) was vibrant and of course has pictures on the website. As we know that book Nonhuman Primates in Biomedical Research, Volume 2, Second Edition: Diseases (American College of Laboratory Animal Medicine) has many kinds or genre. Start from kids until teenagers. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are usually make you bored, any it offers up you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading which.
