Scientific Soapmaking: The Chemistry of the Cold Process By Kevin M. Dunn

Until now, there were just two kinds of books on soapmaking. Books for the commodity soap industry emphasized the economical production of soap by the ton and were written for those with a background in chemistry and chemical engineering. Books for the emerging craft industry emphasized the production of high-quality soap by the pound and were aimed at those familiar with the format of cookbooks. Makers of handcrafted soap often wish they had paid more attention in chemistry class so that the information of the commodity soap books would be accessible to them. Scientific Soapmaking answers that call by bridging the gap between the technical and craft literatures. It explains the chemistry of fats, oils, and soaps, and it teaches sophisticated analytical techniques that can be carried out using equipment and materials familiar to makers of handcrafted soap. Presented in a college textbook format, Scientific Soapmaking guides students and individual soapmakers alike to formulate questions about soap and design experiments to answer those questions scientifically.

Editorial Review

Users Review

From reader reviews:

Thomas Brim:

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each publication has different aim or perhaps goal; it means that publication has different type. Some people really feel enjoy to spend their time to read a book. They may be reading whatever they take because their hobby is actually reading a book. Why not the person who don't like reading a book? Sometime, particular person feel need book once they found difficult problem or even exercise. Well, probably you should have this Scientific Soapmaking: The Chemistry of the Cold Process.

Ken Martin:

Spent a free time for you to be fun activity to do! A lot of people spent their down time with their family, or their friends. Usually they undertaking activity like watching television, going to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? Can be reading a book might be option to fill your cost-free time/ holiday. The first thing that you will ask may be what kinds of publication that you should read. If you want to try look for book, may be the book untitled Scientific Soapmaking: The Chemistry of the Cold Process can be great book to read. May be it can be best activity to you.

Kate Vasquez:

Playing with family within a park, coming to see the water world or hanging out with good friends is thing that usually you may have done when you have spare time, subsequently why you don't try issue that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Scientific Soapmaking: The Chemistry of the Cold Process, you could enjoy both. It is fine combination right, you still want to miss it? What kind of hangout type is it? Oh occur its mind hangout people. What? Still don't have it, oh come on its called reading friends.

Virginia Johnson:

This Scientific Soapmaking: The Chemistry of the Cold Process is great reserve for you because the content and that is full of information for you who always deal with world and also have to make decision every minute. This particular book reveal it data accurately using great manage word or we can state no rambling sentences in it. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only

gives you straight forward sentences but challenging core information with lovely delivering sentences. Having Scientific Soapmaking: The Chemistry of the Cold Process in your hand like obtaining the world in your arm, data in it is not ridiculous just one. We can say that no publication that offer you world inside ten or fifteen minute right but this guide already do that. So , this can be good reading book. Hello Mr. and Mrs. busy do you still doubt that will?
