MPLS-Enabled Applications: Emerging Developments and New Technologies (Wiley Series on Communications Networking & Distributed Systems) By Ina Minei, Julian Lucek

With a foreword by Yakov Rekhter

"Here at last is a single, all encompassing resource where the myriad applications sharpen into a comprehensible text that first explains the whys and whats of each application before going on to the technical detail of the hows."

—Kireeti Kompella, CTO Junos, Juniper Networks

The authoritative guide to MPLS, now in its Third edition, fully updated with brand new material!

MPLS is now considered the networking technology for carrying all types of network traffic, including voice telephony, real-time video, and data traffic. In *MPLS-Enabled Applications, Third Edition*, the authors methodically show how MPLS holds the key to network convergence by allowing operators to offer more services over a single physical infrastructure. The Third Edition contains more than 170 illustrations, new chapters, and more coverage, guiding the reader from the basics of the technology, through all its major VPN applications.

MPLS Enabled-Applications contains up-to-date coverage of:

- The current status and future potential of all major MPLS applications, including L2VPN, L3VPN, pseudowires and VPLS.
- A new chapter with up to date coverage of the MPLS transport profile, MPLS-TP.
- MPLS in access networks and Seamless MPLS, the new architecture for extending MPLS into the access, discussed in depth for both the unicast and the multicast case.
- Extensive coverage of multicast support in L3VPNs (mVPNs), explaining and comparing both the PIM/GRE and the next generation BGP/MPLS solutions, and including a new chapter on advanced topics in next generation multicast

VPNs.

- A new chapter on advanced protection techniques, including detailed discussion of 50 ms end-to-end service restoration.
- Comprehensive coverage of the base technology, as well as the latest IETF drafts, including topics such as pseudowire redundancy, VPLS multihoming, IRB and P2MP pseudowires.

MPLS-Enabled Applications will provide those involved in the design and deployment of MPLS systems, as well as those researching the area of MPLS networks, with a thoroughly modern view of how MPLS is transforming the networking world.

"Essential new material for those trying to understand the next steps in MPLS."

—Adrian Farrel, IETF Routing Area Director

"*MPLS-Enabled Applications* takes a unique and creative approach in explaining MPLS concepts and how they are applied in practice to meet the needs of Enterprise and Service Provider networks. I consistently recommend this book to colleagues in the engineering, education and business community."

—Dave Cooper, Chief IP Technologist, Global Crossing Ltd

About the Author

Ina Minei is a network protocols engineer at Juniper Networks whose focus is MPLS protocols and applications, DiffServ-aware traffic engineering and network convergence. She has helped to implement these and other features into the JUNOS operating system. She is active in industry forums, has presented MPLS tutorials at the North American Network Operators' Group conference and is a regular contributor to the IETF. She is the author of Juniper Networks' whitepaper on Diffserv-aware traffic engineering. Prior to joining Juniper Networks, she worked for Cisco Systems on the development of a next generation router operating system.

Julian Lucek has worked with the Photonics Research Department at British Telecom where he co-built the world's first all-optical regenerator before moving into the IP field to evaluate new routing platforms. His current post is that of Consulting Engineer for Juniper Networks working with major Service Providers on MPLS deployments. He is the author of many published papers in the field of communications technology and holds several patents in that area.

Users Review

From reader reviews:

Eduardo Baro:

Have you spare time for a day? What do you do when you have considerably more or little spare time? Yes, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a stroll, shopping, or went to the particular Mall. How about open or read a book entitled MPLS-Enabled Applications: Emerging Developments and New Technologies (Wiley Series on Communications Networking & Distributed Systems)? Maybe it is to be best activity for you. You know beside you can spend your time with your favorite's book, you can better than before. Do you agree with it is opinion or you have other opinion?

Sandra Phillips:

This MPLS-Enabled Applications: Emerging Developments and New Technologies (Wiley Series on Communications Networking & Distributed Systems) book is just not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is information inside this reserve incredible fresh, you will get facts which is getting deeper an individual read a lot of information you will get. That MPLS-Enabled Applications: Emerging Developments and New Technologies (Wiley Series on Communications Networking & Distributed Systems) without we comprehend teach the one who studying it become critical in thinking and analyzing. Don't be worry MPLS-Enabled Applications: Emerging Developments and New Technologies (Wiley Series on Communications Networking & Distributed Systems) can bring once you are and not make your handbag space or bookshelves' turn into full because you can have it with your lovely laptop even phone. This MPLS-Enabled Applications: Emerging Developments and New Technologies (Wiley Series on Communications Networking & Distributed Systems) having very good arrangement in word along with layout, so you will not feel uninterested in reading.

Agatha Roughton:

Reading a publication tends to be new life style in this era globalization. With reading you can get a lot of

information that could give you benefit in your life. Using book everyone in this world can share their idea. Books can also inspire a lot of people. Lots of author can inspire their particular reader with their story or even their experience. Not only situation that share in the textbooks. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors nowadays always try to improve their proficiency in writing, they also doing some research before they write on their book. One of them is this MPLS-Enabled Applications: Emerging Developments and New Technologies (Wiley Series on Communications Networking & Distributed Systems).

Mary Haskell:

Your reading sixth sense will not betray a person, why because this MPLS-Enabled Applications: Emerging Developments and New Technologies (Wiley Series on Communications Networking & Distributed Systems) reserve written by well-known writer who knows well how to make book which might be understand by anyone who else read the book. Written inside good manner for you, dripping every ideas and composing skill only for eliminate your hunger then you still skepticism MPLS-Enabled Applications: Emerging Developments and New Technologies (Wiley Series on Communications Networking & Distributed Systems) as good book not simply by the cover but also from the content. This is one e-book that can break don't judge book by its deal with, so do you still needing one more sixth sense to pick this particular!?! Oh come on your reading through sixth sense already alerted you so why you have to listening to yet another sixth sense.
